For use with your 3G USB Cellular Modem (not included)

# 3G Wireless USB Cellular Router

## Create your own personal *HotSpot* to allow multiple users to share internet access

Are you still using “dial up” for an internet connection? Do you live in an area where Hi-Speed Cable or DSL are not an option? Would you like to create your own Wifi Hotspot anywhere? Aluratek introduces its new 3G / 4G Wireless USB Cellular Routers that allow you to get Hi-Speed internet access anywhere you get a cellular signal. Simply insert your USB cellular 3G / 4G modem into the router’s USB port and you are all set.

This is the perfect solution for setting up mobile work stations, providing internet access for conventions, tradeshows, and hotel rooms. Perfect for creating an instant HotSpot to allow multiple users to share internet access on cross country trips in a car, van or RV. Ideal for emergency services and first responders and many others.

- Create instant WiFi hotspots at any location where you have a 3G connection
- Supports 3G USB cellular modems
- Can also work with your existing DSL or cable modem
- Compatible with 802.11b / g devices
- Supports NAT, routing, firewall, VPN pass-through & DHCP server
- Supports EV-DO, HSDPA, and HSUPA
- Supports 64/128 bit WEP, and WPA / WPA2 encryption
- Connection Wizard for easy setup
- Web based GUI for router management
- 1 Year Warranty

## WHAT CAN I DO?

Connect your 3G USB Cellular Modem to the wireless router to create your own personal WiFi HotSpot.

### A HOME

Multiple users can connect to the internet via wired RJ-45, wireless 802.11b/g or your 3G Wireless USB Cellular Modem.

### B CONVENTIONS / TRADESHOWS

Don’t pay to have internet access at your next tradeshow or convention. Multiple users and devices can access for free.

### C HOTELS / BOARDROOMS

Create your own HotSpot for multi-user internet access. No more hotel internet fees!
